SPRING TERM 2020-21 YEAR 5			
Breadth	Threshold Concept	Milestone 3 Yr 5 and Yr6	Activities (that relate to Threshold Concepts and the Milestone indicators)
History			
	Investigate and interpret evidence	<ul> <li>Use sources of evidence to deduce information about the past.</li> <li>Select suitable sources of evidence, giving reasons for choices.</li> <li>Use sources of information to form testable hypotheses about the past.</li> <li>Seek out and analyse a wide range of evidence</li> </ul>	Use sources of evidence to understand what life was like during the Shang Dynasty. Finding out about: jobs, food, social class, building and key materials. Use sources of evidence to find out about the different emperors of the Shang Dynasty. Compare what was happening in Britain at the same time as the Shang Dynasty in Ancient China.
The Shang Dynasty		<ul> <li>Show an awareness of the concept of propaganda and how historians must understand the social context of evidence studied.</li> </ul>	the different Gods that they <b>worshipped</b> . Find out about the <b>written script</b> that was used created during the Shang Dynasty.
		<ul> <li>Understand that no single source of evidence gives the full answer to questions about the past.</li> <li>Refine lines of enquiry as appropriate.</li> </ul>	Understand why the Shang Dynasty ended and what happened afterwards. Explain the changes that occurred during the Shang Dynasty. <u>Resources to support:</u> https://www.bbc.co.uk/teach/class-clips-video/history-ks2-
	Build an overview of world history	Identify continuity and change in the history     of the locality of the school.	introducing-the-shang-dynasty/zv79wty https://www.bbc.co.uk/bitesize/topics/z39j2hv/articles/zqtn6yc
		• Give a broad overview of life in Britain from medieval until the Tudor and Stuarts times.	https://www.bbc.co.uk/bitesize/topics/z39j2hv/articles/zx8dcj6
		• Compare some of the times studied with those of the other areas of interest around the world.	https://www.bbc.co.uk/bitesize/topics/z39j2hv/articles/zsm6qhv Oak National Academy learning resources

		Describe the social, ethnic, cultural or	
		religious diversity of past society.	
		Describe the characteristic features of the	
		a Describe the characteristic realists of the	
		pasi, including ideas, beliefs, armodes and	
		experiences of men, women and children.	
	Understand	• Describe the main changes in a period of	
	Chronology	history (using terms such as: social, religious,	
		political, technological and cultural).	
		Identify periods of rapid change in history	
		and contrast them with times of relatively	
		little change	
		<ul> <li>Understand the concepts of continuity</li> </ul>	
		and change over time, representing them, along	
		with evidence, on a time line.	
		Use dates and terms accurately in	
		describing events	
•	Communicate	Ise appropriate historical vocabulary	
	bistorically	to communicate including:	
	Instoliculty		
		• dates	
		• time period	
		• era	
		• chronology	
		continuity	
		• change	
		change	
		• century	
		• decade	
		• legacy.	

Geography		<ul> <li>Use literacy, numeracy and computing skills to an exceptional standard in order to communicate information about the past.</li> <li>Use original ways to present information and ideas.</li> </ul>	
Biomes and Climate zones	Investigate places	<ul> <li>Collect and analyse statistics and other information in order to draw clear conclusions about locations.</li> <li>Identify and describe how the physical features affect the human activity within a location.</li> <li>Use a range of geographical resources to give detailed descriptions and opinions of the characteristic features of a location.</li> <li>Use different types of fieldwork sampling (random and systematic) to observe, measure and record the human and physical features in the local area. Record the results in a range of ways.</li> <li>Analyse and give views on the effectiveness of different geographical representations of a location (such as aerial images compared with maps and topological maps - as in London's Tube map).</li> <li>Name and locate some of the countries and cities of the world and their identifying human and physical characteristics, including hills, mountains, rivers, key topographical features and land-use patterns; and understand how some of these aspects have changed over time.</li> </ul>	<ul> <li>What is a blome? Look at what the term 'biome' means, and locate and label biomes across the world.</li> <li>Using a range of sources to investigate different biomes. Research in pairs, identify relevant information, including information about their physical features. Compare with another biome.</li> <li>Focus on Ice biome. Look at the location of these on maps and look from google maps perspective. Use the terms polar ice caps to describe landscapes. Look at temperature and sunlight hours in these areas, why does this occur? Why do children think herbivores don't live in this area? Look at animals that habitat these environments. Introduce children to the term 'permafrost'.</li> <li>https://www.youtube.com/watch?v=SxwKa5cR3w4 https://www.youtube.com/watch?v=b-9xDztBhzE</li> <li>What is a climate zone? What does the term 'climate' mean? Look at different climate zones across the world. Can children make any comparisons between climate zones and biomes? Locate and label climate zones across the world.</li> <li>What is climate change and why is it relevant to us? Discuss how human activity is accelerating climate change. Look at the work of people such as David Attenborough and WWF who are highlighting the issues for us (One Planet). https://www.wwf.org.uk/get-involved/schools/school-campaigns/shaping-our-future</li> </ul>

	Name and locate the countries of North and South America and identify their main physical and human characteristics.	How can we help to <b>reduce climate change</b> ? Watch the following clip: <u>https://www.wwf.org.uk/learn/love-</u> <u>nature/frozen-world</u> Look at terms <b>greenhouse gases, fossil</b> <b>fuels, global warming, carbon footprint.</b> <u>https://www.wwf.org.uk/sites/default/files/2019-</u> <u>12/WWF KS2 Lesson3 Presentation.pdf</u>
Investigate patterns	• Identify and describe the geographical significance of latitude, longitude, Equator, Northern Hemisphere, Southern Hemisphere, the Tropics of Cancer and Capricorn, Arctic and Antarctic Circle, and time zones (including day and night).	
	• Understand some of the reasons for geographical similarities and differences between countries.	
	• Describe how locations around the world are changing and explain some of the reasons for change.	
	• Describe geographical diversity across the world.	
	• Describe how countries and geographical regions are interconnected and interdependent.	
Communicate geographically	Describe and understand key aspects of:	

		• physical geography, including: climate zones,	
		biomes and vegetation belts, rivers, mountains,	
		volcanoes and earthquakes and the water cycle.	
		• human apparantly including: settlements land	
		- <b>Iterational geography</b> , inclouding, semements, land	
		Use, economic activity including trade links, and	
		the distribution of natural resources including	
		energy, tood, minerals, and water supplies.	
		• Use the eight points of a compass, four-	
		figure arid references, symbols and a key (that	
		uses standard Ordnance Survey symbols	
		to communicate knowledge of the United	
		Kingdom and the world	
		kingdom and me wond.	
		· Create many of leastions identifying	
		• Create maps of locations identifying	
		parteins (such as: iana use, ciimate zones,	
		population densities, neight of land).	
Art & Design			
	Develop ideas	Develop and imaginatively extend ideas from	Lesson 1
	•	starting points throughout the curriculum.	What is <b>sculpture</b> ? Use Tate Modern website to go
		Collect information, sketches and resources	through everyptice of formeus aculatures and artists
		and present ideas imaginatively in a sketch	inrough examples of ramous sculptures and anisis.
		book	Children to have example pictures of sculpture and
		• Use the qualities of materials to enhance	respond to each with vocabulary generated.
		idear	
		• Spot the potential in unexported results as	Lesson 2
			Focus on a famous <b>sculptor artist</b> Learn about his work
		work progresses.	and how it was are stad, respond to his work
		• Comment on artworks with a fluent grasp of	and now it was created, respond to his work.
		visual language.	4
	Master	Painting	Lesson 3
	Techniques	Sketch (lightly) before painting to combine	Look at <b>terracotta army</b> sculptures, focus on their history.
		line and colour.	Sketch <b>techniques</b> of a terracotta army figure.
		<ul> <li>Create a colour palette based upon colours</li> </ul>	
		observed in the natural or built world.	Lesson A
		Use the qualities of watercolour and acrylic	
		paints to create visually interesting pieces.	sculpting techniques – use atterent sculpting technique
		Combine colours, tones and tints to enhance	with playdough.
		the mood of a piece.	
		Use brush techniques and the qualities of	Lesson 5 and 6
		paint to create texture.	<b>Desian and create</b> a terracotta army figure using clay.
1			

	r
• Develop a personal style of painting, drawing upon ideas from other artists.	
<ul> <li>Collage</li> <li>Mix textures (rough and smooth, plain and patterned).</li> <li>Combine visual and tactile qualities.</li> <li>Use ceramic mosaic materials and techniques.</li> </ul>	
<ul> <li>Sculpture</li> <li>Show life-like qualities and real-life proportions or, if more abstract, provoke different interpretations.</li> <li>Use tools to carve and add shapes, texture and pattern.</li> <li>Combine visual and tactile qualities.</li> <li>Use frameworks (such as wire or moulds) to provide stability and form.</li> </ul>	
Drawing	
• Use a variety of techniques to add interesting effects (e.g. reflections, shadows, direction of sunlight).	
• Use a choice of techniques to depict movement, perspective, shadows and reflection.	
• Choose a style of drawing suitable for the work (e.g. realistic or impressionistic).	
• Use lines to represent movement.	
Print	
Build up layers of colours.	
• Create an accurate pattern, showing fine detail.	
• Use a range of visual elements to reflect the purpose of the work.	

		Textiles	
		Show precision in techniques.	
		Choose from a range of stitching techniques.	
		Combine previously learned techniques to create pieces.	
		Digital Media • Enhance digital media by editing (including sound, video, animation, still images and installations).	
	Take inspiration from the greats	<ul> <li>Give details (including own sketches) about the style of some notable artists, artisans and designers.</li> <li>Show how the work of those studied was influential in both society and to other</li> </ul>	
		<ul> <li>Create original pieces that show a range of influences and styles.</li> </ul>	
Design & Technolo	ġy		
	Master practical skills	Food	<b>Lesson 1 –</b> Types of bread. Bread tasting and evaluating session
		• Understand the importance of correct storage and handling of ingredients (using knowledge of micro-organisms).	Lesson 2 – Bread diet (discussion about levels of bread consumed). How is bread made – look at a recipe. Lesson 3 – Designing bread. Think about small alterations
		• Measure accurately and calculate ratios of ingredients to scale up or down from a recipe.	Lesson 5 – Evaluate the bread that we have made.
		• Demonstrate a range of baking and cooking techniques.	
		• Create and refine recipes, including ingredients, methods, cooking times and temperatures.	
		Materials	

• Cut materials with precision and refine the finish with appropriate tools (such as sanding wood after cutting or a more precise scissor cut after roughly cutting out a shape).	
• Show an understanding of the qualities of materials to choose appropriate tools to cut and shape (such as the nature of fabric may require sharper scissors than would be used to cut paper).	
Textiles	
• Create objects (such as a cushion) that employ a seam allowance.	
• Join textiles with a combination of stitching techniques (such as back stitch for seams and running stitch to attach decoration).	
• Use the qualities of materials to create suitable visual and tactile effects in the decoration of textiles (such as a soft decoration for comfort on a cushion).	
Electricals and electronics • Create circuits using electronics kits that employ a number of components (such as LEDs, resistors, transistors and chips).	
Computing • Write code to control and monitor models or products.	
Construction • Develop a range of practical skills to create products (such as cutting, drilling and screwing, nailing, gluing, filing and sanding).	
Mechanics	

	Design, make, evaluate and improve	<ul> <li>Convert rotary motion to linear using cams.</li> <li>Use innovative combinations of electronics (or computing) and mechanics in product designs.</li> <li>Design with the user in mind, motivated by the service a product will offer (rather than simply for profit).</li> <li>Make products through stages of prototypes, making continual refinements.</li> <li>Ensure products have a high quality finish, using art skills where appropriate.</li> <li>Use prototypes, cross-sectional diagrams and computer aided designs to represent designs.</li> </ul>	
	Take inspiration from design throughout history	<ul> <li>Combine elements of design from a range of inspirational designers throughout history, giving reasons for choices.</li> <li>Create innovative designs that improve upon existing products.</li> <li>Evaluate the design of products so as to suggest</li> </ul>	
Science		improvements to the user experience.	
	Work scientifically	<ul> <li>Plan enquiries, including recognising and controlling variables where necessary.</li> <li>Use appropriate techniques, apparatus, and materials during fieldwork and laboratory work.</li> <li>Take measurements, using a range of scientific equipment, with increasing accuracy and precision.</li> </ul>	Famous Scientists Lesson 1 / 2 – David Attenborough Lesson 3 / 4 – Eva Crane Lesson 5 / 6 – Leonardo da Vinci

		Record data and results of increasing complexity	
		using scientific diagrams and labels classification	
		keys, tables, bar and line graphs, and models.	
		Report findings from enquiries including oral and	
		written explanations of results, explanations	
		withen explanations of results, explanations	
		involving causal relationships, and conclusions.	
		Present findings in written form displays	
		and other presentations	
		and other presentations.	
		<ul> <li>Use test results to make predictions to set</li> </ul>	
		up further comparative and fair tests	
		<ul> <li>Use simple models to describe scientific</li> </ul>	
		ideas, identifying scientific evidence that has	
		been used to support or refute ideas or arguments.	
	Understand plants	Relate knowledge of plants to studies of	
		avalution and inhoritance	
		Relate knowledge of plants to studies of all living	
		things.	
-	Understand	• Describe the changes as humans develop to old	
		and and and and and and an	
	animais ana	age.	
	humans		
		<ul> <li>Identify and name the main parts of the human</li> </ul>	
		circulatory system, and describe the functions of	
		the heart blood vessels and blood	
		<ul> <li>Recognise the importance of diet, exercise,</li> </ul>	
		drugs and lifestyle on the way the human body	
		functions	
		• Describe the ways in which nutrients and water	
		are transported within animals, including humans.	

Investigate living       • Describe the differences in the life cycles of a         • Describe the life process of reproduction in some plants and animals.       • Describe how living things are classified into broad groups according to common observable characteristics.         • Describe how living things are classified into broad groups according to common observable characteristics.       • Give reasons for classifying plants and animals based on specific characteristics.         • Understand evolution and inheritance       • Recognise that living things have changed over the same kind, but normally ordsping of the same kind, but normally offsping vary and are not identical to their parents.         • Recognise that living things produce offsping of the same kind, but normally offsping vary and are not identified to their parents.       • Identify how animals and plants are adapted to suff their environment in different ways and that adaptation may lead to evolution; and their environment in different ways and that adaptation may lead to evolution and their environment in different ways and that adaptation may lead to evolution; under their show their environment is different ways and that adaptation may lead to evolution; evolution and their environment in different ways and that here every any materials based on evidence from comparative and fair tests, including their hardness, solubility, conductivity (electrical and therein their avionment is different as a solution.         • Understand how some materials will dissolve in liquid to form a solution and describe how to recover a substance from a solution.       • Understand how some materials will dissolve in liquid to form a solution and secribe how to recover a substance from a solution.			
Image       mammal, an amphibian, an insect and a bird.         • Describe the life process of reproduction in some plants and animals.       • Describe the life process of regroduction in some plants and animals.         • Describe the life process of regroduction in some plants and animals.       • Describe the life process of regroduction in some plants and animals.         • Understand evolution and inheritance       • Recognise that living things are classified into bost of specific characteristics.         • Give reasons for classifying plants and animals based on specific characteristics interactive information about living things that inhabiled the Earth millions of years ago.         • Recognise that living things produce offspring of the same kind, but normally offspring vary and are not identical to their parents.         • Identify how animals and plants are adapted to sult their environment in different ways and that adaptation may lead to evolution.         • Recognise that indiving their harden bases to mage the indiving their hardness. solubility, conductivity (electrical and thermal), and response to magnets.         • Understand thermal and plants are adapted to sult their environment in different ways and that adaptation may lead to evolution.         • Understand for tests, including their hardness. Solubility, conductivity (electrical and thermal), and response to magnets.         • Understand how some materials will dissolve in liquid to form a solution.         • Use knowledge of solids, liquids and gases to decide how mixtures might be separated, including thering, sieving and exaparating.	Investigate living	<ul> <li>Describe the differences in the life cycles of a</li> </ul>	
Provide the life process of reproduction in some plants and animals.     Process of reproduction in some plants and animals.     Process of classified into broad groups according to common observable characteristics.     Give reasons for classifying plants and animals based on specific characteristics.     Process of the common of	thinas	mammal, an amphibian, an insect and a bird.	
Investigate <ul> <li>Describe the life process of reproduction in some plants and animals.</li> <li>Describe how living things are classified into broad groups according to common observable characteristics.</li> <li>Olive reasons for classifying plants and animals based on specific characteristics.</li> <li>Recognise that living things have changed over living things that inhabited the Earth millions of years ago.</li> <li>Recognise that living things produce offspring of the same kind, but normally offspring vary and are not identification to heir parents.</li> <li>Investigate</li> <li>Identify how animals and plants are adapted to subtriber on your and group together everyday materials will dissolve in hardness, solubility, conductivity (electrical and their and for thest, including their hardness, solubility, and response to magnets.</li> <li>Understand terms, solubility, and response to magnets.</li> <li>Understand for tests, including their hardness, solubility, and response to magnets.</li> <li>Understand how some materials will dissolve in liquid to fam a solution.</li> <li>Use knowledge of solids, liquids and gases to decide how thardness, including their separated, including their bardness, solubility.</li> <li>Use knowledge of solids, liquids and gases to decide how thardness, solubility the separated, including their hardness, solubility.</li> <li>Use knowledge of solids, liquids and gases to decide how mixtures might be separated, including through filtering, sieving and evaparating.</li> <li< th=""><th>3</th><th></th><th></th></li<></ul>	3		
Plesche meille process of reproduction in some plants and animals.     • Describe how living things are classified into broad groups according to common observable characteristics.     • Give reasons for classifying plants and animals based on specific characteristics.     • Give reasons for classifying plants and animals based on specific characteristics.     • Recognise that living things have changed over time and that fassils provide information about living things that inhabited the Earth millions of years ago.     • Recognise that living things produce offspring of the same kind, but normally offspring vary and are not identical to their parents.     • Identify how animals and plants are adapted to suit their environment in different ways and that adaptation may lead to evolution.     • Compare and for tests, including their hardness, solubility, conductivity (electrical and thermal), and response to magnets.     • Understand how some materials will dissolve in liquid to farm a solution and describe how to recover a substance tram a solution.     • Use knowledge of solids, liquids and gases to decide how writeres might be separated, including their parents, sieving and exaporation.			
Investigate       plants and animals.         Understand       • Describe how living things are classified into broad groups according to common observable characteristics.         Understand       • Give reasons for classifying plants and animals based on specific characteristics.         Understand       • Recognise that living things have changed over time and that fossils provide information about living things that inhabited the Earth millions of years ago.         • Recognise that living things produce offspring of the same kind, but normally offspring vary and are not identical to their parents.         • Identify how animals and plants are adapted to suit their environment in different ways and that adaptation may lead to evolution.         Investigate materials       • Compare and group logether everyday materials based on subtime, conductivity (lectrical and thermal), and response to magnets.         • Understand how some materials will dissolve in liquid to form a solution.       • Use knowledge of solids, liquids and gases to decide how mixtures might be separated, including through filtering, sieving and evaporting.		<ul> <li>Describe the life process of reproduction in some</li> </ul>
